# DOMINION® KX III USER STATION

HIGH PERFORMANCE IP KVM SWITCH ACCESS

The Dominion KX III User Station is a standalone appliance for high performance IP access to servers connected to Dominion KX III switches. It can sit on a desk, be mounted in a standard 19" rack, or VESA-mounted on the back of a monitor. Deploy it using standard Cat5 cabling and Ethernet/IP technology. Simultaneously access, view, and control multiple servers, spread across single or dual monitors.

The User Station can replace outdated analog matrix switches, replace/supplement expensive, inflexible broadcast systems or be deployed anywhere hassle-free IP access is needed. It's perfect for broadcast labs, studios, control rooms, offices, and data centers.
